21	22 – May	10	Community	Tatitlik	12
21		120			922

Total courses taught: 22; Total hours of training: 120; Total individuals served: 922

Media coverage provided by: Flyers, word-of mouth, 96.9 the Wolf, 105.5 Movin 105, KVAK Public Radio Valdez and KHNS Haines; editorial stories written by Debra McGhan were submitted to Frontiersman, Coast Magazine, Snowrider Magazine, Make-A-Scene (magazine,) Fairbanks News Miner, Sitka Herald, Juneau Empire, the AAIC Website, Blog, Facebook and Twitter. Press Releases were also sent out by the North America Outdoor Institute.

In addition to courses held, AAIC provided backcountry education and support information at international events held in the state including: Tailgate Alaska (estimated attendance 4,000); Arctic Man (estimated attendance 15,000); Mountain Man Hill Climb (estimated attendance 7,000.)

The AAIC provided weekly trail information reports on six (3) radio stations (Anchorage, Haines, Valdez) for a total of 18 weeks and support was also provided for avalanche forecast information and dissemination.

All of us affiliated with AAIC appreciate the opportunity to partner with the NAOI on behalf of the Alaska Dept. of Public Safety for this important public safety effort.

We strongly believe that more should be done to support Alaska Public Safety in providing public service programs that help to educate our citizens. While the cost of search and rescue missions continues to climb, the investment in prevention has remained stagnant or fallen off. We believe this must change. We are confident that if Alaska invests more dollars preemptively, we will not need to spend so much responding.

We also believe that issuing the contract to provide these programs in the fall, rather than waiting until early February when we are fully into our season, will allow a greater opportunity to effectively prepare, hire and train staff, secure and allocate resources, and promote the program to reach many more residents. If there is anything we can do to help ensure this contract is issued earlier in the season, please let us know. Our goal is to publish our calendar of available programs by early November to assist the public and schools in planning their personal training schedules.

This concludes the 2014-2015 winter education season. Everyone involved in this effort looks forward to the future as we work together to strengthen partnerships and continue growing and improving our outdoor safety education outreach programs.

Please let us know if you have any questions or need further information. Thank you.

Sincerely,

Debra McGhan
AAIC Executive Director

ADDENDUM TO REPORT

Following is a list of communities that requested programs we did not have resources to fulfill but hope to serve in the future. Service High, Hanshew Middle, King Career, South Anchorage, Wendler, Romig, Mirror, Chugiak, Hutchison, Cordova, Delta, Tok. In addition we had calls from several small communities and there were numerous other locations that did not know about the program, but have need that we would like to reach out to in the future.

With Alaska's numerous mountain ranges and so much winter in which to explore and play, making sure we do our very best to educate people about the potential dangers is imperative.

It is our goal to continue growing the pool of qualified educators to help expand the programs available for Alaskans across our state. We appreciate your help and support that will enable us to achieve this goal.

Sincerely,

Debra McGhan
AAIC Executive Director
